Commissioner of New York, said in a recent address in connection with his retirement from that office:

"I came into office with decided leanings toward the anti-corporation view of public utility questions. Some of my good friends among corporation lawyers in Binfalo were kind enough to say that I was too much of an anarchist to be of much use as a commissioner. Want of knowledge as to the precise point invested in have found in many cases to be the principal cause of prejudices. I then entertained. Experience has taught me that there is another side to these questions not lightly to be dismissed.

Theid the view, as I imagine many another holds, that New York Central is grossly overcapitalized, and is paying

E. & C. Randolph—The statement of bank clearings throughout the United States points very clearly to one pertinent fact in the situation. Outside of New York the gain in clearances over the same week a year ago is 11-4 per cent, and to this extent only has the commercial activity of the country apparently been affected. The various reports made by the trade journals today bear out very distinctly the fact that pessimism in the easters identified with stock market operations is distinctly at variance with the current trade returns and the feeling in the sections of the country influenced by the very generally favorable crop returns. The market was a small fatureds affail with market was a small fatureds affail with market and closting within increasing the considerable irregularity.

Pallures this week were 26, against 25 last year. Reports show that in many sections of the country trade is more active than a year ago.

Belgium is seeking a \$120,000,000 load

Special weakness in Atchison is said to have been influenced by the fact, that more than \$6,00,000 of the 1996 issue of convertible bonds has been exchanged for stock since the privilege became operative, June 2.

The identity of the houses handling large buying orders in certain stocks during the past few days is claimed by some sources to indicate that the betandard Oil interests, which inquisited heavity last year at higher prices, are now active on the buying side.

O. K. Lyle—The government report due on Monday will not be announced until after the close. My guess is that it will make the average condition of winter wheat about 54 vs. 11.9 last month and 56.5 the ten-year average to May 1.

Floor brokers are reported to have found inside support during the drive a American Can on strike talk and a ru-mor of the filling of a dissolution sui-by the government this week.
